

Interclean 2022

Cleanfix News

After the two pandemic years, we can offer you interesting news.
The RA435 is on the market! A beautiful machine, we are glad to introduce it to you.
What else do we have new? Enjoy reading our Cleanfix News.

Clean, cleaner, Cleanfix

Production

Despite the tough times, we were able to achieve our sales targets 2021.

We were able to compensate for the sometimes crazy prices, i.e. electronic components/steel/copper/packaging, thanks to efficiency, improved production processes and the negotiating skills of our purchasing department.

Recently, we have put into operation the latest generation of a rotary machine. Now the whole mold is no longer rotated in the oven, but is rotated directly in the mold by heating coils. This saves material, time and energy.

EAN bar code

All our items have received an EAN barcode.

Rotary machine

Cleanfix in India

Shevaran - strategic partner in India.

With our long-term partner Shevaran (known for their excellent chemical products) we are building a production facility for the Indian market.

A competence center for training in our products and cleaning agents and their application is being built at the same site.

We firmly believe in the potential of the Indian market and are therefore optimally positioned.

Website with webshop

Since February 2022 our new website with integrated webshop is up and running.

The entire product range is clearly presented with all important information and downloads.

Browse through the pages.

If you have any questions, please contact us. We will be happy to advise you competently, either directly from our headquarters in Switzerland or via our seamless dealer network.

Our strength - your advantage

Thanks to the extensive spare parts catalog of all machines, simply and clearly presented with exploded views, spare parts can be ordered conveniently. We guarantee spare parts for at least 10 years.

We attach great importance to resource conservation and provide a reliable repair service worldwide.

Dry vacuum cleaner

The robust quality, the high performance and the simple operation convince.

We have further developed the „indestructible“ S10 plus.

In addition to the practical cable holder and cable strain relief, the new ergonomic handle also offers two positions for the telescopic suction tube. The selection of nozzles has been extensively expanded.

S10 plus SL

We now offer the powerful dry vacuum cleaner as a sled vacuum cleaner.

Its features: four rubberized low-noise casters (2 fixed, 2 movable), protected on-off switch, plastic parts shockproof and recyclable.

HEPA Models

Of course all models are also available as HEPA version.

Handle with cable holder and cable strain relief

Four rubberized low-noise casters (2 fixed, 2 movable)

Two positions for the telescopic suction tube

Scent granules

S10 RE

We attach great importance to sustainable and resource-saving production, which is why we use 75% recycled plastic granulate in the injection process of the hood of the Cleanfix S10 RE.

In addition, we use a different suction motor and more interesting accessories, creating an advantageous offer.

At CLEANFIX, the topic of sustainability as well as the continuous reduction and avoidance of CO2 emissions plays an important role.

Wet and dry vacuum cleaner

The demand for cost-effective wet/dry vacuum cleaners is growing steadily. We now have the SW22 & SW35 models in our range.

In addition to the well-known SW60, we now offer the SW22 and the SW35.

All types are characterized by the good suction power.

And, a significant advantage - all three models have the same accessories.

SW22

Volume tank 20 liter / Working width 37 cm

SW35

Volume tank 35 liter / Working width 37 cm

Easy operation

Motor head with floater

High-quality container

Dry cleaning: dustbag

Dry cleaning: large-area filter

Same accessories for SW22, SW35 and SW60

Scrubber dryer

RA435 IBC

Designed and built in the usual Cleanfix quality for daily cleaning of stores, hotels, offices, workshops and more, the compact and maneuverable RA435 IBC stands out.

The easy operation through digital display will reduce user training time to a minimum. Due to the effective curved suction nozzle as well as the simple water regulation you will achieve a perfect cleaning result on all hard floors. You can also adjust the suction power by 3 positions according your needs. The 750 W powerful brush motor and the ergonomic, easy adjustable handle are further plus points.

With the intelligent accessories such as the hook for the brush and the transport wheel for easy transfer and parking of the machine, you have everything you need.

Ergonomic adjustable handle with suction nozzle lift-off

Digital display 3 suction power levels

Water flow regulation

Filling hole for fresh water tank

Large dirty water tank with efficient suction motor protection thanks to float system

Simple brush mounting

Special accessories

Brush holder for scrubbing brush

Transport wheel for easy transfer

Suction kit with hose and telescopic tube for optimal cleaning in the corners

RA435 IBC DE LUXE

This "high-end" floor cleaning machine has been further developed from the basic RA435 IBC model.

The following changes have been incorporated and make this machine the state of art in the 43 cm cleaning industry.

- Engageable, simple handle adjustment reduces the turning circle in seconds
- Suction nozzle can be raised and lowered again with the foot

The RA435 IBC de Luxe includes the following accessories from the standard machine:

- Brush holder for scrubbing brush
- Transport wheel
- Suction kit
- Fresh water emptying
- Stretch hose for dirty water emptying

Ergonomic handle, directly adjustable with lever. Possible for storage all the way up or down.

Suction nozzle can be easily operated with the foot.

Fresh water emptying

Suction kit with hose and telescopic tube for optimal cleaning in the corners

Compact attachment to the machine for storage

Suction kit

RA435 B Green – The environmentally friendly concept

100Ah lithium battery with large charger

The battery is fully charged in about 3 hours instead of more than 10 hours. When the indicator is low, the battery is charged back to 60% extremely quickly. Lithium-ion batteries last between 2000-2500 cycles and are maintenance free. The operating time of the machine can be extended depending on the application and the faster loading gives better efficiency.

Lithium batteries offer up to 20% savings than buying a machine with another battery and have a higher and more constant power output.

Antibacterial tank

The innovative antibacterial tank coating protects the plastic and also ensures reduced fungal and bacterial development. This not only extends the service life of the tanks, but also ensures improved hygiene, reduced odor development and lower consumption of disinfectants for tank cleaning.

Pad 70% less water

The impressive cleaning performance of the new hybrid cleaning pad ensures numerous positive effects. Cleaning experts save costs and time when using it and have a lasting effect on the quality of the floors with the gentle cleaning. Because when used with rotating scrubber-driers, the new pad's special structure cleans effectively and cost-efficiently without affecting or damaging the substrate. And all this 100% chemical-free.

Special accessories

Cleanfix Ozone Generator

The ozone water generator for the highest demands on cleanliness and hygiene. Environmentally friendly and sustainable cleaning. The ozone water generator converts normal tap water into ozonized water. This

creates an extremely powerful and inexpensive cleaner that works very well and especially on greasy dirt. 600,000 liters of water with an ozone concentration of 0.5 - 1.2 mg/liter can be produced without maintenance.

All-purpose cleaner tab

Innovative highly concentrated premium cleaning product. Ideal for coated and uncoated types of coverings. Very good separation behavior in waste water. Simple and safe dosing, dosing systems are superfluous, tab in water-soluble film. Less packaging waste and better CO² balance values.

Eco-Power Universal Cleaner

The OECD test 302B extended attests excellent biodegradability and non-toxicity to sewage sludge bacteria. That is, eliminability $\geq 95\%$ DOC after 14 days or, in cases where microbial adaptation is first required, eliminability $\geq 90\%$ DOC after 14 days and $\geq 97\%$ DOC after 28 days. Mineralization $\geq 70\%$ after 28 days, measured as carbon dioxide production.

RA470 IBC

Designed and built in the usual Cleanfix quality for the daily cleaning of stores, hotels, offices, workshops, etc., the compact and ultra-compact RA470 IBC features.

Due to the roller brush you have a wonderful forward drive. Thanks to the revolutionary brush drive, you work right up to the wall without leaving an uncleaned edge. The narrow roller deck makes the turning circle so small and the RA470IBC so maneuverable that it's a joy. The easy operation through digital display will reduce user training time to a minimum. Due to the effective curved suction nozzle as well as the simple water regulation you will achieve a perfect cleaning result on all hard floors. You can also adjust the suction power by 3 positions according your needs.

Ergonomic adjustable handle with suction nozzle lift-off

Digital display 3 suction power levels

Water flow regulation

Filling hole for fresh water tank

Large dirty water tank with efficient suction motor protection thanks to float system

Cleaning close to the edge due to integrated brush drive

Simple brush lifting

Roller brush

Special accessories

Key for disassembly of the roller brush

Roller brush hard

Roller brush 5K

Scrubber dryer

RA431E X

Here we combine the robustness of our well proven RA431E with the most effective way of floor cleaning:
With the eccentric - motor head.

The RA431E X for medium surfaces quickly produces exceptional cleaning results on all hard surfaces.

The eccentric movement and weight clean joints and textured floors in each pass. Due to the round shape of the motor head, the machine, although equipped without a drive motor, has a nice forward drive and is easy to maneuver.

RA395B L

The RA395B is newly equipped with a 50Ah lithium battery. This offers the following advantages over gel batteries:

- 20 % longer runtime
- 2000 charge cycles, about 3.5x more than gel batteries
- Thanks to larger charger 2x faster charging
- Extremely fast charging from a low level to 60%
- High constant power output
- Up to 20% savings on the purchase of the machine

Excenter single disc machine

E44 Excenter

With the weight of 66 kg (incl. additional weight) as well as 2720 1/min you have the perfect cleaning result for almost all floors (concrete - and natural stone, PVC, tile, safety floors as well as parquet). You can not only (deep) clean, sanding but also peel coatings.

Our patented handle adjustment as well as the large transport wheels for easy transportation are great advantages. Also useful are the two detents (750.586 kit detent pins) on the body that allow you to either lift the wheels off the ground to leave no running marks or turn the handle completely upside down to get maximum weight on the ground. By adding additional weights in pieces, you can perfectly adapt the machine weight to your application. Simply set up the brush head of the E44 Excenter and you can easily change the pads or store the machine.

Lift the wheels off the ground to leave no running marks

Turn the handle completely upside down to get maximum weight on the ground

Brush head set up for optimal storage

Fully adjustable telescopic handle (photo with special accessories solution tank)

Special accessories

Locking with detent pins

Weights easily adaptable

Large selection of pads

Excenter single disc machine

E50x35 Excenter

With the weight of 66 kg (incl. additional weight) as well as 2720 1/min you have the perfect cleaning result for almost all floors (concrete - and natural stone, PVC, tile, safety floors as well as parquet). You can not only (deep) clean, sanding but also peel coatings.

The square design makes them perfectly fit into any corner. Our patented handle adjustment as well as the large transport wheels for easy transportation are great advantages. Also useful are the two detents (750.586 kit detent pins) on the body that allow you to either lift the wheels off the ground to leave no running marks or turn the handle completely upside down to get maximum weight on the ground. By adding additional weights in pieces, you can perfectly adapt the machine weight to your application. Simply set up the brush head of the E44 Excenter and you can easily change the pads or store the machine.

Ozone Generator

This intelligent ozone water purifier will make your life simpler and more comfortable. It works automatically once your install it to your tap.

- Intelligent product: works automatically by itself
- Kill 99.6 % germs
- High performance with 0.5-1.0 mg/L ozone concentrations
- Super stable ozone outputs
- Remove chemical residues and pesticides
- Environment friendly & no pollution
- Compact size and wall-mounted design

What is ozone exactly?

Ozone (O₃) is an unstable form of Oxygen (O₂) and has a total of three atoms, unlike stable Oxygen that has only two atoms. Ozone is the 2nd strongest known oxidiser and the most powerful readily available water sanitiser. It kills bacteria and viruses over 3,000 times faster and is a 50% stronger oxidiser than chlorine.

How does it work?

As ozone circulates and comes into contact with airborne (or waterborne) pathogens, one of the three oxygen atoms detaches itself from the Ozone molecule, attaches itself to the pollutant and oxidises it and turns it into a safer compound. Ozone is nature's way of cleaning our environment.

Technical data

Ozone Concentrations	0.5 ~ 1.0 mg/L in water
Input voltage	230V AC
Driving voltage	12V DC
Rated Power	8 W
Ozone Module	Corona discharge; 300mg/H OZQS0.2-D
For Tap water flow	4 - 8 L/min
For tap water pressure	0.14 - 0.7Mpa
Operate temperature	0 - 60 °C
Product Size(L x W x H)	223 x 162.5 x 54.5 mm
Package Size(L x W x H)	27 x 24 x 11 cm
Product Weight	1 kg with accessories

Pads

Blue Wave Melamine Pad - without chemistry

Compared to conventional melamine pads, the Blue Wave melamine pad differs in its unique structural design.

The reinforced structure essentially increases the service life during cleaning work.

Due to its eraser effect, this pad can easily clean all stubborn dirt on smooth and hard surfaces, such as heel marks on floors, using only water - without chemicals.

The Blue Wave Pad must always be used wet and is not suitable for working on lacquers.

Nubs - pads

Structured floor coverings present a problem for cleaning and maintenance in that the deeper zones of the structure are not optimally reached, processed or cleaned with the conventional, familiar cleaning products such as super pad discs or even cleaning brushes.

The solution to this problem is the patented nub pads, which can be adapted to the structures of the hard coverings in terms of their nub structure and size as well as the abrasive grits used so that thorough deep cleaning can be achieved. The nub pads should always be used wet and, in the case of heavier soiling, in conjunction with cleaning and care agents in accordance with the recommendations of the covering manufacturers.

Nub pad white - no abrasiveness

Abrasive-free pad for removing light dirt during polishing and waxing. For leveling after care product application.

Nub pad purple - light abrasiveness

Pad with very fine abrasive grit for removing adherent dirt and light walking marks. Suitable for sanding, i.e. removing release agent layers from new coverings before applying sealers. Ideally suited for regular maintenance cleaning.

Terribly strong. Hybrid cleaning pads.

Hybrid cleaning pads are suitable for use with oscillating and rotating single-disc machines and scrubber-driers.

The impressive cleaning performance of hybrid cleaning pads ensures numerous positive effects. When used, cleaning experts save costs, time and have a lasting effect on the quality of the floors with the gentle cleaning. Because when used with rotating and oscillating single-disc machines as well

VreactiV technology

Deeply effective and gentle at the same time: The unique VreactiV technology cleans the floor efficiently and is gentle to the surface. The specially developed 3-layer structure distributes the contact pressure in the hybrid cleaning pads efficiently and evenly over the 3D active surfaces. There, SiC micro-grains sit in a mobile bond that efficiently and gently removes impurities.

Increased contact pressure

The five 3D active elements of the hybrid cleaning pads not only provide optimum pressure distribution, but also increased contact pressure. The raised 3D active elements provide up to 400% higher contact pressure and can thus loosen even the strongest contaminants.

as scrubber-driers, the pad's special structure cleans effectively and cost-efficiently without affecting or damaging the substrate.

And it's all 100% chemical-free.

Sustainably produced, developed and manufactured in Germany.
